Subject: FFT Product

Frank,

We at **38 Freight LLC** have been using your product for nearly 5,000 miles and wanted to let you know that it **REALLY WORKS**. We averaged 5.3 miles per gallon with our 2005 Peterbilt 387 Tractor before using FFT but now we are up to an average of 6.5 miles per gallon with your additive. With lighter refrigerated loads (We own a 53 foot refrigerated Utility Trailer.) we are getting as high as 7.1 miles per gallon. With the price of diesel fuel going into the mid \$4.00 range, your wonderful additive is providing a substantial savings to our company during these hard times. It is helping us stay alive while others around us are going out of business. Keep up the great work! You have really developed a truly marvelous product!

PS. Our truck loves it too. It just runs cleaner and better with less emissions.

Sincerely,

38 Freight LLC

Mark Rosen – Office Manager
